AGENDA ITEM STAFF ANALYSIS

Project/Issue Name: Discussion and possible vote on moving the City Council meetings to the Community Center.

Submitted by: Councilman Brian Buckner

Date: October 8, 2007

Issue Statement

The current City Council chambers are not citizen friendly with regard to access and seating.

Discussion and/or Analysis

The City Council chambers in City Hall are not citizen friendly with regards to easy access and seating capacity. There are also concerns when the City Council needs to meet in Executive Session. Both issues need to be corrected, but the cost of remodeling City Hall could be cost prohibitive when looking at the overall value of City Hall. This discussion is about the possibility of relocating the City Council meetings to the Community Center where the facility has good access and a large seating capacity as well as facilities the Council can use for Executive Session.

Recommended Action

Discussion purposes only. No action required.
